Download osConcert – Complete Seat Booking System for Developers

Who Is This For?

This download is intended for developers, agencies, and web professionals who want a complete, customizable, and self-hosted seat booking system. Perfect for integrating into client projects, building ticket platforms, or reselling as a tailored solution.

What You Get

- Full source code of osConcert (PHP/MySQL)
- Support for Reserved Seating and General Admission
- Built-in eTicket generator with barcode
- Stripe, PayPal, and other payment options
- Admin panel with Bootstrap 5.3
- Seat Plan Maker (external or hosted)
- Tools for CSV Import/Export and Ticket Assignment
- Installation script and sample data

Requirements

- A web server with PHP 8.1 or 8.3 support
- MySQL or MariaDB database
- Hosting with cPanel or SSH access recommended
- Familiarity with basic PHP and MySQL (for advanced customization)

Important Notes

- This is a paid download.
- Your license includes fast personal support from the developer.
- Optional add-ons like payment module setup or customized seat plans are available.

How to Get Started

1. Visit https://www.osconcert.com/download
2. Register for an account, add product to basket and checkout.
3. You'll receive a download link immediately and license terms
4. Follow the installation instructions included in the ZIP file or at installation.

Support Included

- Fast personal email support
- Installation assistance (if requested)
- Help with enabling seat plans and events
- Integration advice for payment gateways

This is not just code — it's a professional platform with real support.
